

## **Tornado Technologies Expands Internet Services with D-Webjazz Merger**

CLEVELAND, OH (September 20, 2007) Tornado Technologies announced today the expansion of their Internet Web Division with the addition of Julie D'Alosio, president and CEO of D-Webjazz. D'Alosio has operated a growing successful web development enterprise serving NE Ohio for the past seven years. As the new Director of Internet Web for Tornado, D'Alosio brings a wealth of knowledge and experience in web design and development as well as Search Engine Optimization to the Tornado organization.

"We are excited to have Julie on board," said Mark Roshon, president of Tornado. "Not only does she bring a vast knowledge of marketing and Internet services to her new role, but her experience as a successful small business owner over the past seven years allows her to have a unique empathy and understanding for our customer's needs."

The addition of D'Alosio and expansion of the Internet department at Tornado completes their ability to satisfy any technology need of their customers. "Most companies specialize in one facet of technology or another," explains Roshon. "There are website design companies, however, they don't offer software development; there are companies offering IT support but don't have the expertise in Search Engine Optimization. At Tornado we offer every aspect of technical support so our customers can rely on resource for all their needs."

Customers of D-Webjazz will benefit from the merger as well.

"I have a loyal following of customers throughout the region and I am excited that this new role will enable me to offer them a wider range of sophisticated IT solutions including programming and IT support," said D'Alosio. "It is a great fit for all concerned."

A prior Ambassador business award winner from the Northfield Hills Chamber of Commerce, Julie D'Alosio combines her vast knowledge of the Internet, computer skills and creative artist talents to design customer-pleasing search friendly websites. D'Alosio joined Tornado Technologies September 4, 2007 and will continue to serve the existing D-Webjazz customers as well as Tornado Technologies customers.
